IMAGE PROMPTS YOU CAN PASTE INTO THE AI IMAGE GENERATOR YOU PREFER.

1

CHOOSE

Select a creation mode or open a Starter Recipe.

2

CUSTOMIZE

Describe the subject, colors, and must-have details.
Open Add More Polish when you want precise control.

3

CREATE

Choose 1-4 variations and select Generate prompt.

4

Two ways to work

Beginner Friendly. Expert Ready.

USE THE SHORTCUT WHEN YOU WANT INSPIRATION, OR BUILD THE DIRECTION YOURSELF WHEN YOU ALREADY KNOW WHAT YOU WANT.

BEGINNER PATH

- 1 Choose a Starter Recipe.

- 2 Pick a theme.

- 3 Select Create starter.

- 4 Review the filled-in choices.

- 5 Generate and copy.

EXPERT PATH

- 1 Choose the exact creation mode.

- 2 Enter your own brief.

- 3 Set style, finish, layout, and optional details.

- 4 Remove conflicting choices.

- 5 Generate and refine.

FASTEST USEFUL BRIEF

♥
A clear subject + a focused palette + one art style is enough to begin.

MOST CONTROLLED BRIEF

♥
Add finish, made-for purpose, background, lighting, framing, ratio, and only the character or typography details that truly apply.

BEST PRACTICE

♥
Start with fewer clear directions. Add detail only when it supports the main idea. Too many conflicting effects can make the image less accurate.

♥
Create it your way

One idea. Many polished results.

Five Creation Modes

Choose your lane

THE MODE CHANGES THE WORDING AND WHICH DETAIL CONTROLS ARE SHOWN.

1

SINGLE CHARACTER

One person or character. Best for fashion figures, professionals, children, faith characters, and lifestyle art.

2

COUPLE OR GROUP

Two or more coordinated people or characters in one scene. Best for friends, families, teams, bridal parties, and couples.

3

OBJECT OR GRAPHIC

A themed arrangement, emblem, phrase-free shirt graphic, decorative centerpiece, or collection of connected objects.

4

INDIVIDUAL CLIPART SET

Several separate matching objects on one sheet. Can also create matching frame and background prompts.

5

MASCOT

A bold animal, creature, or character representing a team, school, business, organization, or event.

!

CHOOSE CAREFULLY

Character appearance controls are used for Single character and Couple or group. Object, clipart-set, and mascot modes stay focused on the graphic itself.

500+ Mixed Directions Per Recipe

How variety works

STARTER RECIPES COMBINE SUBJECT TREATMENTS, ACCENT DETAILS, PALETTES, ART STYLES, FINISHES, LIGHTING, FRAMING, PURPOSES, AND LAYOUTS.

1

SELECTIONS KEEP CHANGING

A new recipe result can change the palette, art style, finish, accents, and overall visual direction.

2

EACH THEME KEEPS ITS OWN PLACE

Birthday, Wedding, Teacher, and other choices progress independently, so switching themes does not reset the others.

3

YOUR PROGRESS IS REMEMBERED

The studio uses your browser storage to continue the sequence when possible.

4

CHANGE DOES NOT MEAN RANDOM CHAOS

The subject stays connected to the chosen theme while the supporting design direction changes.

!

ABOUT REPEATS

With hundreds of mixed combinations, one individual field may reappear while the complete recipe combination changes. Browser-data clearing or private browsing can reset saved progress.

The Three Main Inputs

Your creative brief

THESE FIELDS TELL THE GENERATOR WHAT MATTERS MOST.

1

MAIN SUBJECT OR IDEA

Describe the focal subject and action. Be specific: who or what, what it is doing, and the important theme.

2

COLOR PALETTE

Use 2-5 coordinated colors. The box does not save or suggest colors you entered before.

3

MUST-HAVE DETAILS - OPTIONAL

Add only props, symbols, clothing, decorations, or scene details that must appear.

EXAMPLE 1: SUBJECT

TOO BROAD

Birthday girl

CLEARER

Confident birthday woman holding a crystal cake beside balloons and curling ribbons

TOO MANY COLORS

Ten unrelated colors

CLEARER PALETTE

Troubleshooting Guide

When results are not right

MOST PROBLEMS IMPROVE WHEN YOU SIMPLIFY THE PROMPT AND CORRECT ONE ISSUE AT A TIME.

THE IMAGE FEELS TOO BUSY

Remove conflicting props, uncheck Maximalist, or switch to clean isolated composition.

THE COLORS KEEP DOMINATING

Use 3-4 colors, name the main color first, and request smaller accents in the others.

THE SUBJECT IS CROPPED

Choose full-body or clean isolated composition and keep "no cropped subject."

CLIPART PIECES TOUCH

Reduce the object count and keep "separate, evenly spaced, no touching or overlap."

THE BACKGROUND IS NOT TRANSPARENT

Regenerate with transparent PNG selected, then use a background-removal tool if the model still adds a backdrop.

HANDS OR PROPS ARE WRONG

Request one correction while keeping everything else the same.

WORDS ARE MISSPELLED

Remove typography, generate art only, and add exact wording in Canva.

A RECIPE FEELS OFF-TOPIC

Edit the filled subject or choose Something else and type the exact theme.

A RECIPE REPEATS AFTER BROWSER CLEANUP

Browser storage was likely cleared. Begin the sequence again or customize the result.

COPY IS BLOCKED

Select the prompt text manually and use your device's copy command.

Artwork Quality Review

♥ Before you download or sell ♥

A STRONG PROMPT IMPROVES THE RESULT, BUT THE FINAL QUALITY CHECK IS STILL YOURS.

- ✓ **Subject:** The correct person, object, event, profession, or theme is clear.
- ✓ **Anatomy:** Hands, fingers, faces, eyes, limbs, and body proportions look intentional.
- ✓ **Objects:** Important props are present, correctly shaped, and not duplicated.
- ✓ **Clipart:** Pieces are separate, fully visible, uncropped, and easy to isolate.
- ✓ **Text:** Every word is correct - or the art has no text so you can add it later.
- ✓ **Edges:** No strange halos, accidental borders, blurry outlines, or clipped details.
- ✓ **Background:** Transparency or the chosen scene is correct.
- ✓ **Color:** The palette is cohesive and has enough contrast for the intended use.
- ✓ **Originality:** No copied character, unauthorized logo, watermark, or brand mark appears.
- ✓ **License:** You reviewed your image tool's current commercial-use and resale terms.

RESOLUTION NOTE

The prompt requests the highest available resolution and a 4x upscale, but the image tool may not perform a true upscale automatically. Check the downloaded pixel dimensions.
